

Private Residence, Richmond

Architect: Andraos Associates
Product: Bespoke Timber Shutters & Louvres

CASE STUDY

For the past decade we have seen a rising increase in the popularity and demand for our high quality sliding shutters throughout the whole of the country, with London topping the list of installations. Located in a desirable area of London, this high specification development features our 40/40 sliding shutter systems combined with western red cedar fins and powder coated frames. To the rear of the property there is a stunning garden, and as such this has been a focal point of the entire build. The architect has designed the house maximising both the views and the light ingress.

The home has been designed for modern living and has large open plan living areas that have been further enhanced with the use of our shutters for privacy and shading purposes. Internally, this home has been completed to an extremely high specification. Fine handcrafted furniture, stunning flooring, beautiful fixtures and fitting work together seamlessly and combined with the ContrasoL sliding shutters make this a home that will be as relevant in 10 years' time and beyond, as it is today.
