

# Fontainebleau Las Vegas

Architect: Bergman Walls & Associates (BW&A)

Product: Mega Fins

**CASE STUDY**

As the chosen contractors behind this striking addition to the Fontainebleau legacy, our team at Contrisol have once again redefined design engineering on the famed Las Vegas strip with the installation of these feature Mega Fins to the porte-cochère of this extraordinary building.

Crafted with meticulous precision, the feature fins are composed of three extruded aluminum sections that seamlessly form a stunning asymmetrical diamond shape, and serve to welcome guests into the hotel’s lobby in a spectacular fashion.

The newest addition to the illustrious Fontainebleau brand, the Las Vegas resort boasts an impressive 150,000 square foot casino, world-class dining, vibrant entertainment and nightlife, and more than 3,600 hotel rooms and suites.
